DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 27 May 2008 has been entered.

Allowable Subject Matter

2. Claims 1-7, 9-18, and 21-27 are allowed.
3. The following is an examiner's statement of reasons for allowance: the examiner, after further search and consideration, agrees with the applicant's remarks regarding the novelty and non-obviousness of the invention.
4. The invention is drawn to a resource distributor wherein bandwidth distribution is enforced in large part by the client. In particular, it is determined whether a client is eligible to send more data, based not on an issue of lost packets or on average time measures of bandwidth consumption but on the amount of time that has passed since the last successful receipt of a feed data transmission. The system is further set up such that eligible clients receive the requested feed data immediately, while ineligible clients see the data withheld, but do not see their network connection prolonged. In other words, the system moves away from time-based managers such as TDMA, as well as common load balancing, QoS and SLA systems which operate on a system of average data rates.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further teachings on bandwidth limiters, client eligibility, and feed data.
